

GIVE US 30 SECONDS AND WE'LL SHOW YOU IN 30 DAYS HOW TO SAVE 30% ON YOUR ENERGY COSTS FOR THE NEXT 30 YEARS.

WITH **ULTRA HIGH PERFORMANCE HVAC** FROM OPTIMUM ENERGY

You make the call...

In less time than it takes to heat up a cup of coffee, you can increase the value of your building and reduce your existing HVAC energy consumption costs by at least 30%, for the next 30 years and beyond.

Save energy...

Saving energy is one of the best opportunities to cut costs and reduce your building's harmful environmental effects. HVAC operations can represent approximately 60% of a building's energy consumption. Until now, this has been accepted as fixed operating costs. That's about to change...

Ultra High Performance HVAC shifts energy innovation from hardware to software.

Beyond the box...

Think of Ultra High Performance as technology that goes not just outside the box but beyond it. We provide our patented software in a plug and play optimization appliance that interacts with your Building Automation System. The goal is to make your current HVAC system more efficient by varying electrical and water usage to deliver just the right cooling power to keep occupants comfortable—promoting ultimate efficiency levels and increased cost savings.

WITH A TYPICAL PAYBACK OF 18 TO 36 MONTHS,
 OUR PATENTED SOFTWARE HAS PROVEN ITSELF IN A WIDE RANGE
 OF BUILDINGS REPRESENTING ANNUAL COMBINED OPERATION
 SAVINGS INTO THE MILLION OF DOLLARS.

START WITHOUT STARTING OVER WITH OPTIMUM ENERGY.

Do the math, please...

With a typical payback of 18 to 36 months, our patented software has proven itself in a wide range of buildings representing annual combined operation savings into the million of dollars. Improving operating usage efficiency from around 1.0 kW/ton to 0.5 kW/ton. Or in other words, lowering operating costs by 31 cents per square foot in these buildings.

Visible to your community and your bottom line...

Trust us, people know who's taking the initiative and who's not. You'd be kidding yourself if you think people, businesses and Fortune 500 companies aren't looking for spaces that offer improved comfort, quality and earth-friendly standards. The demand is there and they're willing to pay for it. The question is, will you be ready? Ultra High Performance HVAC can help you get there, so you can take advantage of lower operating costs, higher lease rates and great PR opportunities.

Need more convincing...

You can't say no to free money. There are many areas of the country where you will find support from federal, state and local governments and from the public utility sector. They offer monetary and non-monetary programs including tax credits, certification, rebates and credit documentation.

Excuses don't work, when the decision is this easy...

With OptimumHVAC you no longer have to choose between being profitable or being eco-friendly – you can be both. Call us and for next 30 years help our planet while you watch the cost savings add up.
